Subject: Triennial Review of Florida's Water Quality Standards

I fear greed has taken over in our world, we should all be focusing on the same goal regardless of our political positions. Water quality shouldn't be a debate.

Concerned American

Dear Official, Please adopt the 2016 EPA draft recommended water quality criteria of 4 micrograms per liter for microcystin and 8 micrograms per liter for cylindrospermopsin to best protect recreational users and restore Florida's imperiled waters.
