Subject: Toxic algae

Dear Ms. Sutton,

YES, limits need to be set on toxic algae in our water.

We also need limits on nutrients getting into the water. We need limits on the amount of water taken out of the aquifer too.

Stop the fertilization of lawns and landscapes! That will reduce lots of nutrient runoff.

Please insist on setting limits for toxic algae, nutrients, other pollutants. We NEED CLEAN WATER!

Thank you.

*Sincerely,
Jane Morse*
