Subject: Triennial Review of Florida's Water Quality Standards

Dear Ms Sutton,

I live on the water in Stuart, FL and have concerns about the damage being done to my family.

Please adopt the 2016 EPA draft recommended water quality criteria of 4 micrograms per liter for microcystin and 8 micrograms per liter for cylindrospermopsin to best protect recreational users and restore Florida's imperiled waters.

Thank you for your support.

Joel
