Subject: Tighten water quality standards

As a true Floridian I spent my childhood jumping in the gulf, rivers and water holes in and around Sarasota. I never once was harmed by the quality of the water.

I live on the Treasure Coast now, my sister and I used to have a kayak tour business. We relied on tourists and news of our water problems were such that we had to give up. People just didn't want to get in or around the water in fear of health problems.

Please tighten standards and work to fix the underlying causes.
Thank You for your attention to this devastating problem.
