FDEP should concentrate funding and research to developing specific Cyanotoxin standards within the State of FL. Currently the use of visual algal blooms present is misleading within some central FL lakes. There is little understanding by local governments what the human vs. aquatic life risks are with detections vs. criteria above current detection levels.

EPD is trying to get at least 1,000 residents to take the online Orange County Fertilizer Application Course.

Please help us get there!

Access the course here: [Fertilizer Application for Residents](#)

PLEASE NOTE: Florida has a very broad public records law (F. S. 119). All e-mails to and from County Officials are kept as a public record. Your e-mail communications, including your e-mail address may be disclosed to the public and media at any time.
