Dear Ms. Sutton,

I am re-sending my comments on whether the State of Florida should weigh in on whether to set limits for toxic algae. I had a typo in my first set of comments which may have misconstrued my meaning. I strongly recommend that the State set strong limits for toxic algae. Toxic algae is a public health issue and harms people's health that come into proximity to it. Toxic algae also harms the state's marine life including threatened and endangered wildlife as well as commercially and recreationally valuable species. Toxic algae blooms are harming the state's economy and has caused some small businesses to close. It is in the best interest of the citizens of Florida that the state set strong limits for toxic algae in our waterways.

Sincerely,

Laura Geselbracht

Good afternoon,

I would need you to send me another email with the language corrected because the whole email is part of the record.

Thanks,

Kaitlyn Sutton

Dear Ms. Sutton,

I realized there was a typo in my email. It should have read "harms our citizens..." not "warms". Can you correct this in the record?

The State of Florida should set limits for toxic algae in our state's waters. Toxic algae harms our citizens, the state's wildlife and the state's economy. This is a no brainer.
