Subject: Florida Waters Requires Immediate Tighter Standards to protect our greatest natural resource

Kaitlyn,

As a Florida Resident I plead for the Florida Department of Environmental Protection to tighten the standards for the amount of toxic algae that flows into our waterways. We are destroying Florida's most precious natural resource with every day definitive action is not taken to resolve the problem. I personally became very sick last year with the red tide hitting our Jupiter coastline. We need tight standards to guide change and require businesses , government and citizens to take the necessary action to resolve and make definitive change happen.

Respectfully Submitted,
