Subject: microcystin

Good Afternoon Kaitlyn, My name is Marc G. Yelenich and year round resident of Sanibel Island, FL the epicenter of last summer's blue-green algae / red tide event... I personally collected the first sample from a Sanibel Canal that tested positive for blue-green algae at my dock which was tested by SCCF...

Imagine for a moment YOUR family splashing in the water at the cause way during months surrounding that time frame.

There were NO warnings posted, NO news alerts to stay out of the water, etc....

PLEASE; reduce the 8 parts per Billion of microcystin as considered "toxic" for human health & ORDER the Corp. that they CAN NOT release water from Lake "O" to either coasts when it exceeds that amount !!!

Thank you for your time and consideration.....
