Subject: Water Quality Standards

Good Morning,

I live at 19508 Harbor Road South in Tequesta/Jupiter Florida. My house is located in the intracoastal waterway. I have lived here for 15 years.

In the last two years our grassy flats have disappeared. I am unsure when it happened but as a result most of the sea life has also disappeared. I used to see many sea urchins in the water. At times there would be too many to count. This past summer I never saw 1 sea urchin. The same issue exists for many other types of marine life. These grassy flats extended not only in my backyard but also north and south of my home.

Please check the quality of our water and also determine what happened to the food for our marine life.

Thank you,

Mari Lee Holtzman
