Subject: Clean water.

Dear Miss Sutton:

I suffer from terrible allergies when I take a shower only and solely in Palm Beach Gardens, Florida, 33410, where we live. I do not suffer from allergies in any other part of Florida or abroad.

I sincerely think it is due to the quality of the water. I have been taking medication for allergies for years!!!! That is not good for my pocket as well as for my health.

I would like to suggest cleaning our water supply with other products other than harsh chemicals or maybe osmosis. This is killing me slowly but surely.

Thanks for your attention,

Maria Leticia Garriga
