Subject: Florida Algae Limits

Kaitlyn,

I would like to express my support for formal and enforced algae limits in our water systems in Florida. As a resident of Palm Beach County, I see how much the ocean and waterways play into the quality of life here. The water brings people to the state, raises property values thereby increasing the tax base, provides recreation and employment for thousands, and is the center of Florida's identity and culture.

If we allow the water to be compromised because of a misplaced disdain for regulation of any kind, we are threatening the way of life in Florida and the future of the state. If residents cannot enjoy the water, they will ultimately move somewhere where they can.
