Subject: CE: Mandatory Water Quality Standards are a Necessity!

To Whom it May Concern:

I have been coming to Lee County Florida since 1962 and have lived here full time for over 32 years.

I own a home at 5348 Malibu Ct., Cape Coral on a direct access sailboat canal and I have NEVER seen anything like the Blue-green Algae toxic bloom of 2018.

AND I never want to experience it again. Please do whatever it takes to regulate the amount of toxins allowed before public notice and remediation actions are required by law.

The photo below captured by a news drone just happens to be of my property at the height of the bloom; we could not go near our dock or boat without feeling sick from breathing the toxic fumes.

Please share my concerns and comments with all decision makers in this regard & Help Save Our Water now.

Yours in Public Service,

Michael J. Titmuss
