Subject: Water Quality in Stuart, Florida

I would like to add my comments regarding the water quality in our area of Stuart, Florida.

Water is essential to life.

It's really a shame that I cannot take my young grandchildren to the beaches here when we have algae toxicity in our waters.

The beach should be a natural resource protected for all generations.

Big Sugar should be responsible for the damage they have caused and the sickness that they perpetrate on our state.

I support and encourage any means to make our waters safe again and make those responsible to restore our habitat and return the joy of going to the Florida beaches.

Mr. & Mrs. David Brockwell
