Subject: Toxic Algae

Dear Ms Sutton, I am writing to express my support for eliminating outflow from Lake Okeechobee to the St. Lucie River system, the Indian River Lagoon, and the Atlantic Ocean.

No more taxpayer free ride for Big Sugar. They must pay to clean up their damage to the South Florida environment. The climate crisis has exacerbated the situation. It can no longer be tolerated.

The water quality has progressed from sickening marine life to gassing humans and animals.

I am a 65 year resident of Martin County. We have been fighting for this since I was a child. Our Representative Brian Mast, and others, are finally making some progress.

I am voicing my support for their efforts to improve the water quality of the St Lucie Riverine system.

Thank you for your time and effort.

Nancy Wacha
