Subject: Review of water quality

Ms. Sutton,

With all the horrible water quality we've had over the past few years, I would like to see tightening of standards for the amount of toxic algae allowed in our waterways.

If we do not act now to protect our waters, we will lose people that will not longer spend money to fish on charters, visitors that can't use our beaches and do not want to be in the rivers kayaking either.

Are we going to let this happen to our state and the income that these activities bring to our businesses?
