Subject: Standards for Toxic Algae in Florida Waterways

To whom it may concern:

I live in Jupiter, Florida, and have been negatively affected by the release of toxic algae that eventually makes its way to our beaches. This results in harmful air quality at the beaches as well as prohibitions on swimming in the ocean. Continued episodes will affect both the quality of my life and the tourism industry in Palm Beach County.

Please do what you can to tighten standards for toxic algae in our waterways so that the toxic algae in our local waterways can be brought into healthy levels.

Thank you for your consideration of my comments.
