Subject: Water Quality

Hi Kaitlyn, I wanted to voice my opinion on the water problems causing health problems down here in SW Florida.

We love the area and the weather here. We like to explore and enjoy the surroundings but when the water and in turn the air quality is poor, none of this is possible. We cannot go to the beach during the best time to be there.

I moved my family down here just 4 years ago assuming the care for the environment and water would be similar to what we grew up with in the north east. So far we are not impressed.

This needs to change before it is too late! The state needs to get deeply involved and follow through to clean this mess up!

Thank you

Shawn Adams
