Subject: Water quality in florida

Kaitlyn,

I didn't know we had water quality standards in florida lol because we don't of course. The BEST thing you guys should do IF you actually care about safe water is to STOP ALLOWING CANCER CAUSING HERBICIDES TO BE SPRAYED jeez that is a no brainer literally. We all know fwc doesn't give a crap about anything and same goes for fdep you all have the worst track record of letting polluters do what they want, lying to the public and taking bribes. Prove all of us wrong this time by doing something positive which IS your job and stop letting polluting dump like Mosaic and the farms and demand fwc stop putting poison in our water. Otherwise just admit your agency is a tool for useful idiots and nothing else
