Subject: 8 parts per billion

The blood is on your hands as well as Army core and the Democrats. Now thanks to a few it's known by all who will pay attention!

This has gone to far.

It's time to become the real DEP!

Go after agriculture and make them stop the run off in to lake O.

We have seen the run off in to the river east of the lake "bright blue green!"

Gallons and gallons of bacteria for millions and millions of dollars in sugar profits and other farming.

Please stop life crippling and life ending algae blooms.

Thank you

William Lussier
