Subject: Clean Water Act - Public Comments - Limits on Cyanotoxins (Blue Green Algae)

Good Morning,

Please set and tighten the limits on toxic blue green algae and cyanotoxins to take into account the chronic and acute health effects from exposure to algae. In addition, please apply the recommendations of the State's blue green algae task force including the limits recommendations. Included herein is a quote from an article citing the task force's recommendations:

"Defensible health advisories should be established by the Florida Department of Health and defensible water quality criteria should be established by the Florida Department of Environmental Protection,"

I support including health advisories and water quality criteria which sets limits and requires action to reduce the impact of blue green algae on public health and our natural resources. Thank you.

Sincerely,

Bill
