Subject: Emerging Contaminants ESOC Pilot Project Status Update

Hi Alicia

I wanted to give you an update on where we're at with your Emerging Contaminants ESOC Pilot project. We have reported the majority of results and there are two more batches that will be reported later today. Still outstanding, we have the following:

POCIS

Hormones – Dilutions were required to bring results into the linear range of our instruments. Samples are being reanalyzed and should be reported by the end of next week, or early the following week.

Water

MRES pesticides – reports will be issued next week

SPMD

MRES pesticides – reports will be issued next week

PRC (PAH) – reports will be issued next week

Alkylphenols – this is a new matrix for the method and we have encountered a significant amount of matrix interference. We are looking into how best to handle this and I should have another update for you

If you have any questions or concerns, please don't hesitate to get in touch.

Thanks and have a wonderful weekend!

Megan Preik, B.Sc., P.Chem.
