Save

To create a student, input their name and give them a zip grade ID (or allow the system to auto-generate it). Choose the class that the student belongs in.

*Note: This isn't a requirement to use zipgrade. It is just for if you want to track students. You can also upload an excel file of students into your account www.zipgrade.com

- 20 Question
- 50 Question
- 100 Question

Scanning Students Papers

After choosing the quiz, select “edit key”. Then scan the version of the key that you have made (printed a scantron and filled it in). The key will then populate into the zipgrade system.

Scanning Students Papers

After choosing the quiz, choose “Scan Papers”. Line up the four squares on the scantron and allow your device to scan. The score will be populated at the bottom. Notice that the first section on the left side asks for the zipgrade ID, which you can manually put into zip grade, or zipgrade can generate for you. If use this component of the tool, zipgrade will associate the tool with the ID on the scantron to that in the zipgrade account. Choose “change student” to scan another paper.

Test Analysis and Review at a Later Date

After scanning all the quizzes, the instructor can choose “quizzes” and select the name of the quiz. By choosing “item analysis” he/she can see how the class answered each question.

By selecting “Review Papers”, the instructor can review the scans of students.

Quiz Name: Jan Quiz	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1:	100.0	2	0	0	0	0	0	0	0	0	0	0	0	0	0
2:	100.0	0	2	0	0	0	0	0	0	0	0	0	0	0	0
3:	100.0	0	0	2	0	0	0	0	0	0	0	0	0	0	0
