

Data Checker Removal, Download and Install Instructions

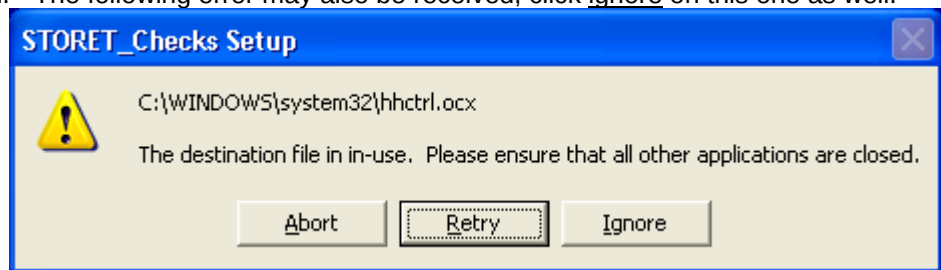

1. Remove the old version of the Data Checker.
 - a. Click Start/Control Panel in Windows XP, or Start/Settings/Control Panel in Windows 2000
 - b. Once in the Control panel double-click on Add/Remove Programs
 - c. Windows will search for all installed software. Once the list is up, scroll down to STORET_CHECKS. Highlight this selection and click Change/Remove. (you will need at least Power User rights to accomplish this)
 - d. It will ask you if you wish to uninstall. Click Yes.
 - e. Next it will ask if you want to keep any shared files. Click Keep on each window that pops up. (Several will popup)
 - f. Windows will proceed to remove the checker. Click Ok when done.
 - g. Navigate to the Storet_Checks program folder located here. <HDL>:\Program Files\STORET_Checks
 - h. Delete this folder, this will completely remove the old version of the checker.
2. Install the latest checker from the STORET website, or ctrl + click here:
<http://www.dep.state.fl.us/water/storet/download.htm#20E>
3. Click on the data checker link. Download the zip file and save it somewhere on your hard drive.
4. Navigate to the zip file that was saved to your hard drive.
 - a. Right-click the zipped file. Point to WinZip and then click Extract to...
 - b. In the Extract to box please enter where you would like to send the zipped up files.
5. Navigate to where the files were extracted.
6. Double-click the Setup.exe file.
 - a. Welcome to the STORET_Checks installation Program. Click OK.
 - b. Click on the huge button with the computer, to install checks.

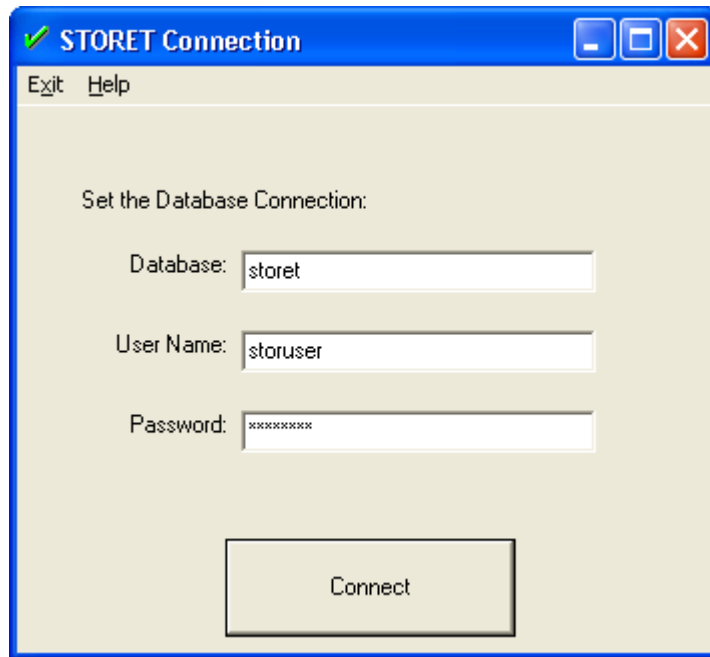

- c. It will ask you if you wish to put it in a program group. The default STORET_Checks is fine.
- d. Checks will proceed to install.
 - i. If you receive the following message click ignore.

- ii. Another dialog box will open asking if you want to ignore the error. Click Yes.
 - iii. The following error may also be received, click ignore on this one as well.

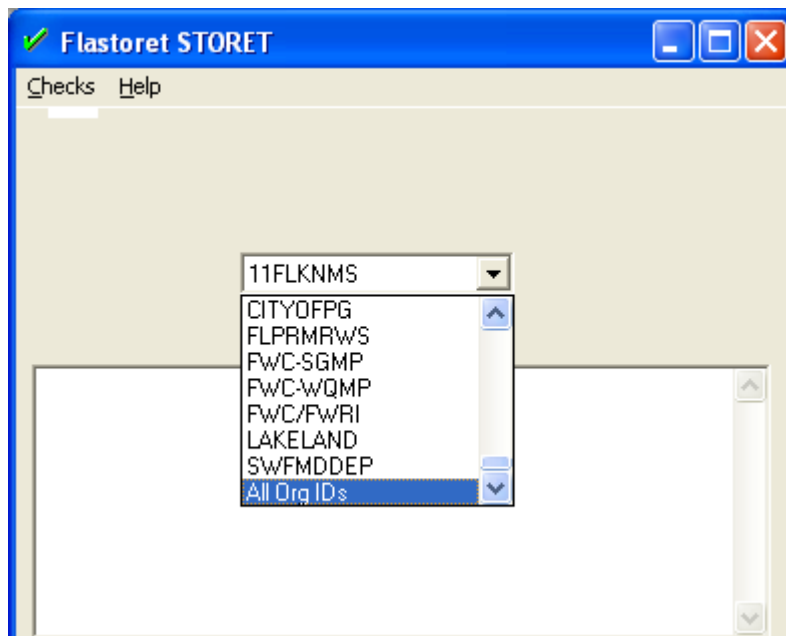

- e. Congratulations, STORET Checker has been installed.
7. Test your local STORET using the Data Checker.
- a. Click Start/Programs/Storet_Checks
 - b. Connect to your database like logging on to STORET.

A screenshot of a Windows-style dialog box titled "STORET Connection". The dialog has a blue title bar with a green checkmark icon and standard window controls. Below the title bar is a menu bar with "Exit" and "Help". The main area is light beige and contains the text "Set the Database Connection:". There are three text input fields: "Database:" with the value "storet", "User Name:" with the value "storuser", and "Password:" with the value "xxxxxxx". At the bottom center is a "Connect" button.

- c. Run checks through your local STORET to view errors. Excel will be needed for the errors to be exported.
8. This program can now be used to check errors for any data imported into STORET. If you have more than one organization_ID in your database, select which organization you wish to check from the drop down menu – or select all.

A screenshot of the "Flastoret STORET" application window. It has a blue title bar with a green checkmark icon and standard window controls. Below the title bar is a menu bar with "Checks" and "Help". The main area is light beige. In the center, there is a dropdown menu that is open, showing a list of organization IDs: "11FLKNMS", "CITYOFP", "FLPRMRWS", "FWC-SGMP", "FWC-WQMP", "FWC/FWRI", "LAKELAND", "SWFMDDEP", and "All Org IDs". The "All Org IDs" option is currently selected and highlighted in blue.

NOTE: Please note that running a complete check on your data can take up to a day. Do not use Excel during the checks process and if possible, try not to use the computer at all while the checker is running.
