No

Collection Time: _____ (24 hr.)
(Different than surface and bottom time in Field Measurements section)If site was a SWTV stream or river but "NO" was selected, why was the SCI not collected(not due for an SCI, tidal, flooded, ≤ 0.05 m/s velocity, etc.)?_____

Comments: Include information such as: estimated level of impact to the system (ex. obvious pollution, none visible, etc.), any variations from normal preservation protocols (ex. adding more than 1 ml acid, etc.), any problems experienced with collecting samples (ex. grab 1 lost due to fall-out, etc.), any site specifics (ex. had to navigate due to heavy vegetation, etc.), any site conditions (ex. recent heavy rains, etc.), description of any photos taken, etc., any qualifiers needed (ex. "J" for failed calibration verification, etc.), the use of fuel-powered equipment, etc.
