

INSTALLING AND REGISTERING THE ARCVIEW 9.1 DEMO EDITION SOFTWARE

Part 1. About the software installation

The ArcView 9.1 Demo Edition software included with this book is intended for use only with ESRI educational products. Once installed and registered, ArcView 9.1 will run for 180 or 365 days, depending on the educational materials with which it was delivered. The time limit cannot be extended, nor can the software be reinstalled on the same machine once the time limit has expired.

If ArcGIS 9.x Desktop software (either ArcView, ArcEditor, or ArcInfo) is already installed on your computer, you do not need to—and, in fact, cannot—install the Demo Edition software. Use the book or training material with the software that is already installed.

If ArcGIS 8 Desktop software (any 8.x version of ArcView, ArcEditor, or ArcInfo) is already installed on your computer, you must uninstall it before you can install the ArcView 9.1 Demo Edition software. (You can subsequently reinstall it.)

If ArcView 3.x software is already installed on your computer, you can install the Demo Edition software. ArcView 3 and ArcView 9.1 can coexist on your computer.

If you have questions or encounter problems during the installation process please use the resources listed below. (The ESRI Technical Support Department does not answer questions regarding the ArcView 9.1 Demo Edition CD.)

- For answers to frequently asked questions about the ArcView 9.1 Demo Edition software and its installation process, open the FAQ.htm located on the software CD.
- To resolve problems with the trial software provided with ESRI Press workbooks, send an e-mail to ESRI workbook support at workbook-support@esri.com. If the trial software was provided for use with a Virtual Campus course please visit the campus support site on the Web at <http://campus.esri.com/support>.

Part 2. System requirements

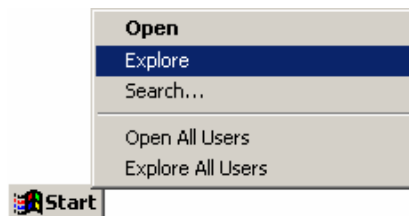

Before you install the Demo Edition software, you should make sure that your computer system satisfies the following minimum requirements.

Processor	Pentium® 1.0 GHz minimum
Operating System	Microsoft Windows Server 2003 Microsoft XP Microsoft Windows 2000
Internet Explorer	Internet Explorer 6.0. (If your computer does not have Internet Explorer 6.0 or a later version, the ArcView 9.1 Demo Edition setup program will notify you of the missing requirements and exit. After installing the appropriate version, you can run the setup program again.)
RAM	512 MB minimum
Disk space	Approximately 1 GB

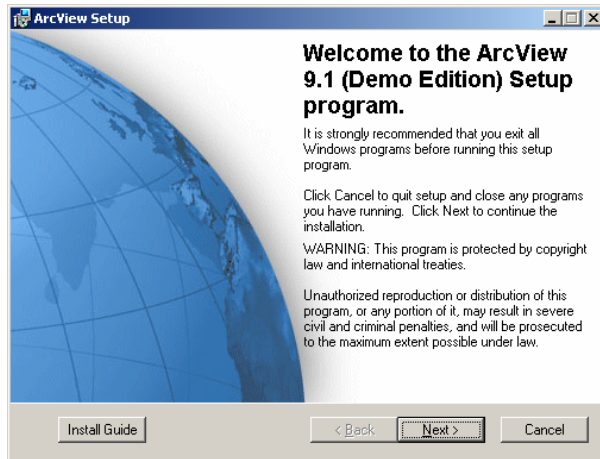

Part 3. How to install the Demo Edition software

The screen graphics in this part reflect the standard appearance of the Windows 2000 operating system. If you have a different operating system, such as Windows XP, your screen images will look slightly different. The differences do not affect the installation steps.

- a. Close all open applications.
- b. Put the ArcView 9.1 Demo Edition software CD in your computer's CD drive.
- c. Right-click the Start button in the Windows taskbar. On the context menu, click Explore to open Windows Explorer.

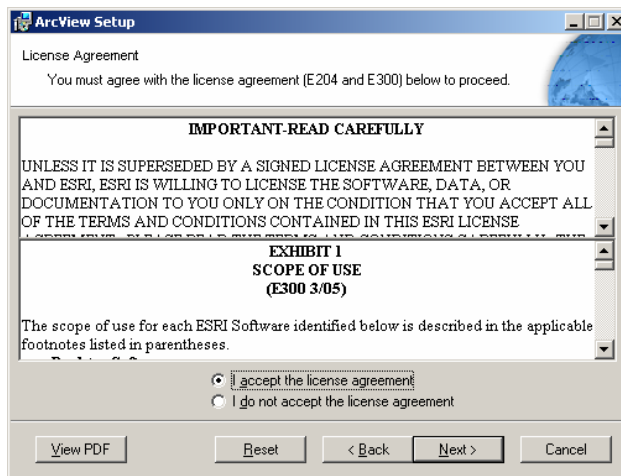

- d. In Windows Explorer, navigate to your CD drive, called ESRI (D:). (The drive letter may be different.) Click the drive icon  to display the contents of the CD.
- e. Double-click the Setup.exe file and wait for the ArcView Setup program to load.

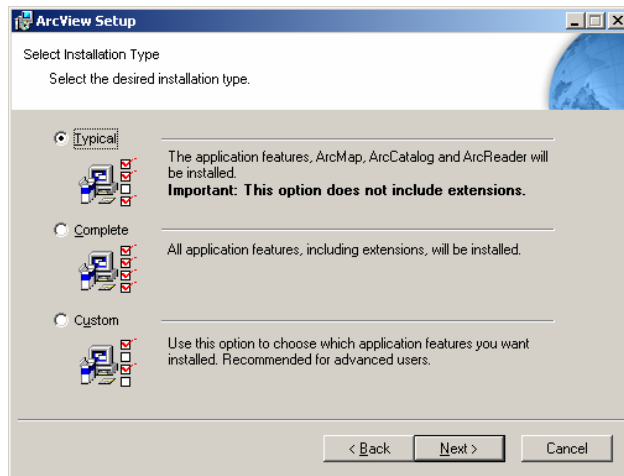

If the program doesn't load and you are instead prompted to install **Microsoft Windows Installer**, click Yes and restart your computer when prompted. If ArcView 9.1 Demo Edition does not then resume installation on its own, navigate to the Setup.exe file and double-click on it again.

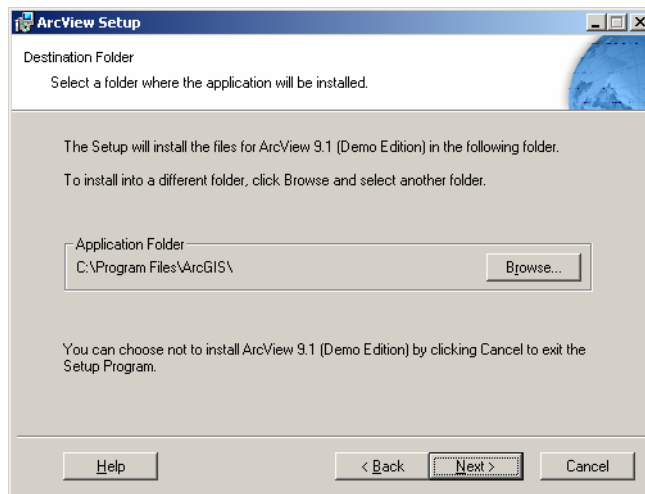

- f. Click Next. Read the license agreement. If you agree to the terms, click "I accept the license agreement," as shown. (If you do not agree to the terms, click Cancel to end the installation.)

- g. Click Next.

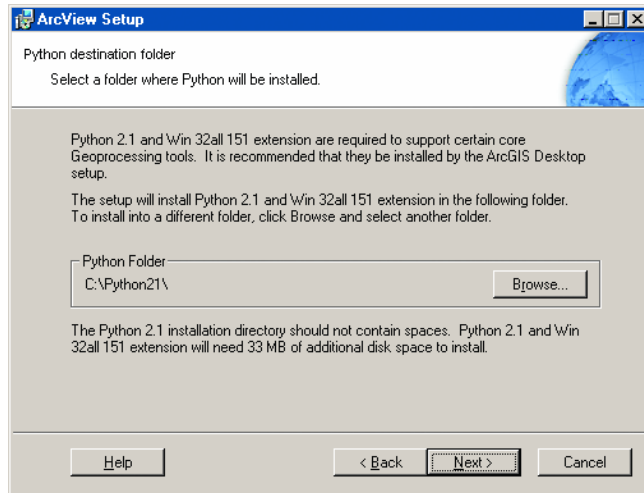

- h. The default installation type is Typical. A Complete install adds all the extension products available with the demo edition software. A Complete install with all the extensions adds about 300 megabytes to the installation. Choose your desired installation type and click Next.

- i. Accept the default installation folder (C:\Program Files\ArcGIS\), unless you have a good reason to choose another folder.

If you want to choose a different folder, click the Browse button and navigate to the location you want. Click OK on the ArcView 9.1 (Demo Edition) Setup dialog box.

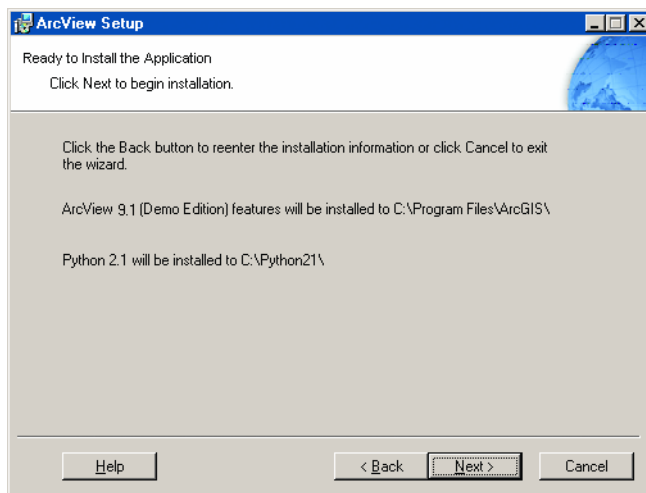

- j. Click Next.

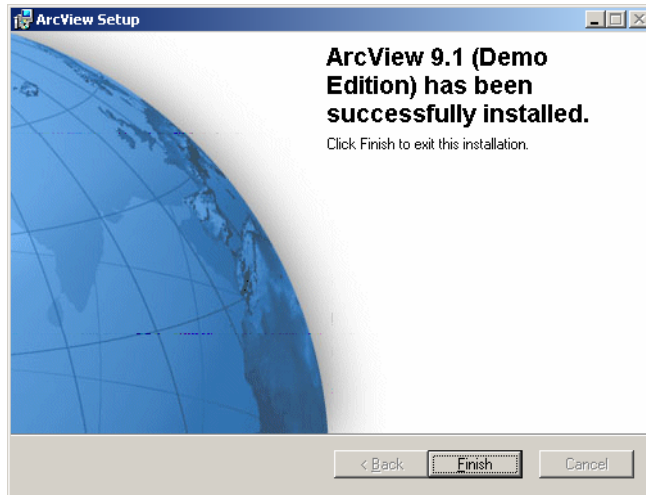

- k. Accept the default installation folder for the Python program (C:\Python2.1), unless you have a good reason to choose another folder.

Python[®] is a scripting language used by some ArcGIS geoprocessing functions. If the Python application is already installed on your computer, the setup program bypasses this step.

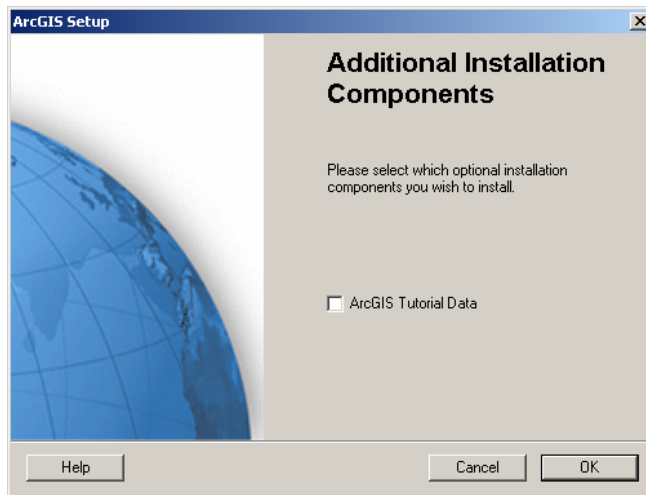

- l. Click Next.

- m. Click Next and let the installation process run. It takes several minutes.

- n. Click Finish. Uncheck the ArcGIS Tutorial Data box, as shown.

This Demo Edition of ArcView 9.1 does not come with the ArcGIS Tutorial data. The educational products used with this software come with their own exercise data.

- o. Click OK.

You are ready to continue with Part 4.

Part 4. About the software registration

ArcView 9.1 Demo Edition software cannot be used until it has been registered.

The recommended way to register the software is over the Internet. This is the simplest and fastest way. The instructions for Internet registration are given below in Part 5, “How to register ArcView 9.1 Demo Edition software over the Internet.”

The software can also be registered in other ways, as listed in Part 7, “Other ways to register the software.”

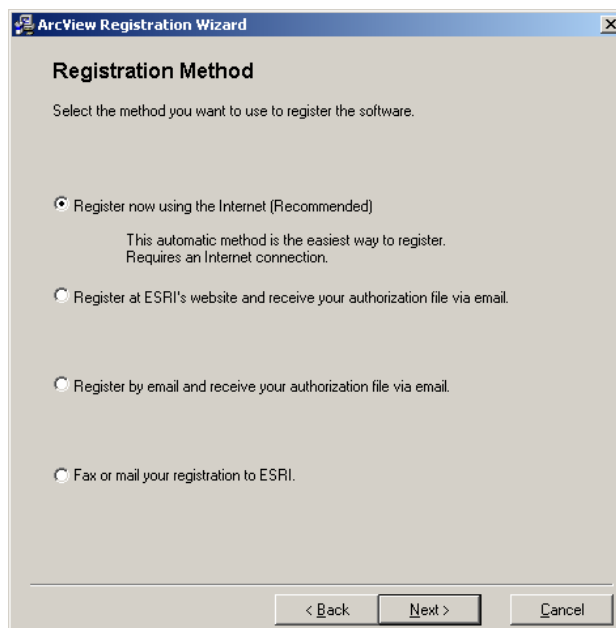

The software evaluation period begins when your registration is processed by ESRI, not when you first use the software. If you do not intend to use the software soon, you should exit the registration process and return to it later. For instructions on resuming the registration process at a later date, see Part 8, “How to resume the registration process.”

Part 5. How to register ArcView 9.1 Demo Edition software over the Internet

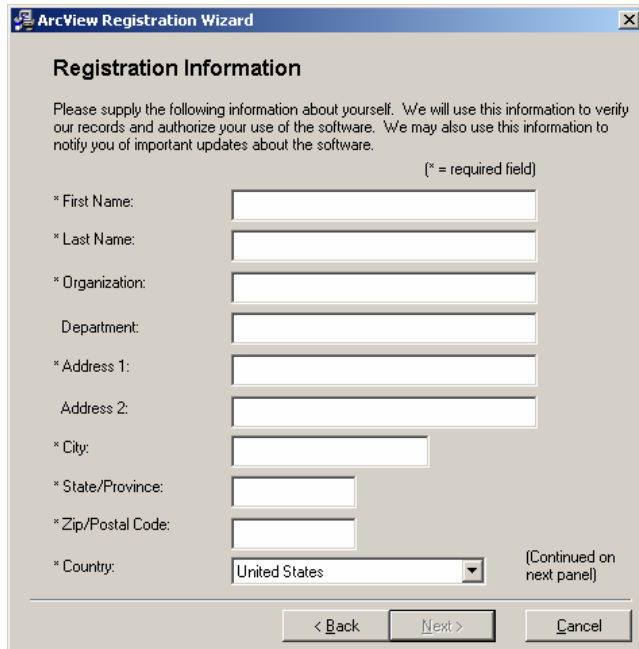

- a. Make sure you are connected to the Internet.
- b. Click Register Now.

- c. Make sure the following option is selected: "I have installed ArcView and need to register the software." Click Next.

- d. Make sure the following option is selected: "Register now using the Internet." Click Next.

ArcView Registration Wizard

Registration Information

Please supply the following information about yourself. We will use this information to verify our records and authorize your use of the software. We may also use this information to notify you of important updates about the software.

(* = required field)

* First Name:

* Last Name:

* Organization:

Department:

* Address 1:

Address 2:

* City:

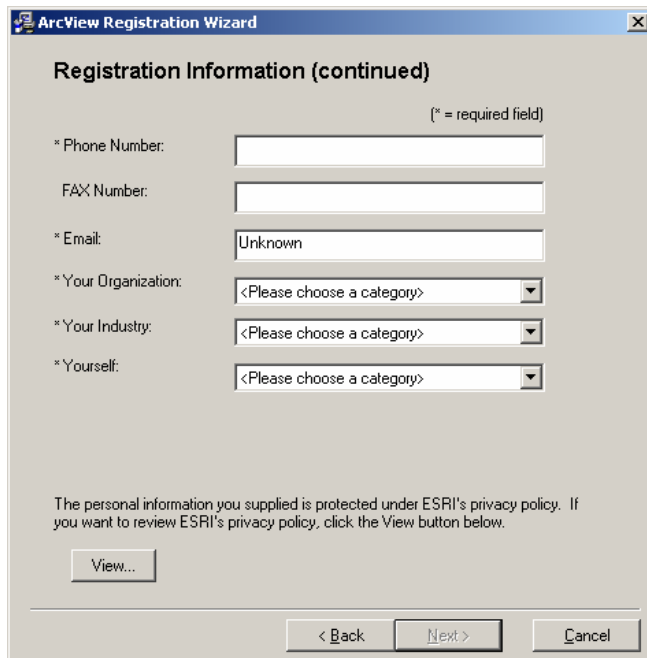

* State/Province:

* Zip/Postal Code:

* Country: (Continued on next panel)

< Back Next > Cancel

- e. Fill out the first part of the registration form with your information. Only English-language characters are accepted. Click Next.

Registration Information (continued)

(* = required field)

* Phone Number:

FAX Number:

* Email:

* Your Organization:

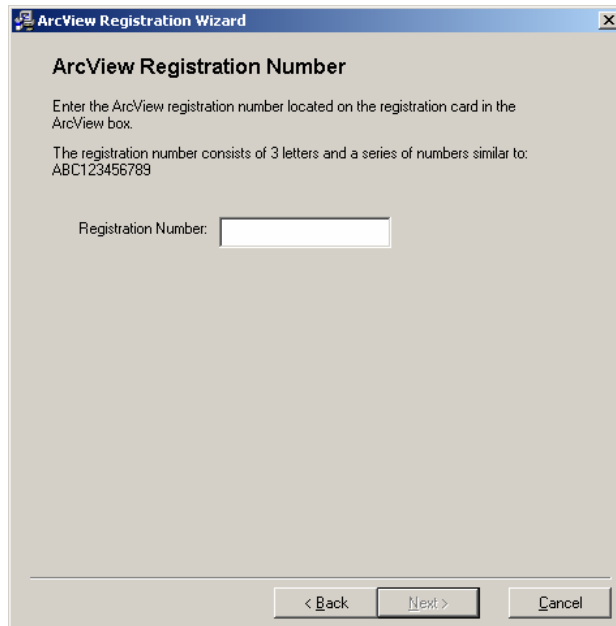

* Your Industry:

* Yourself:

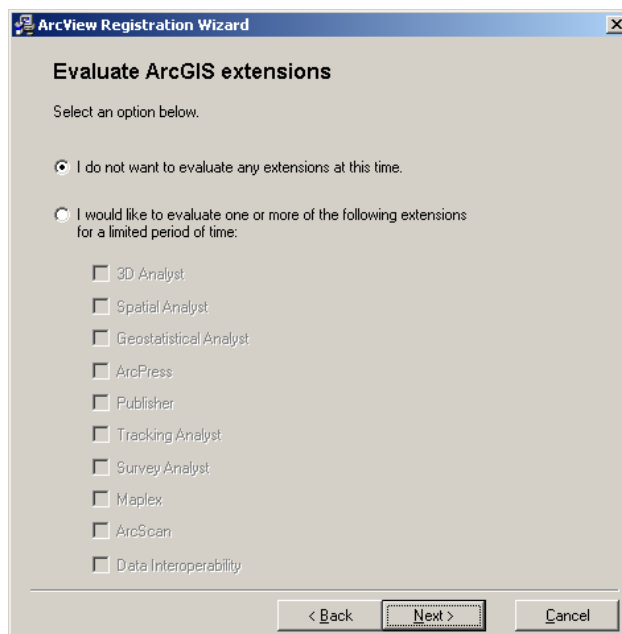

The personal information you supplied is protected under ESRI's privacy policy. If you want to review ESRI's privacy policy, click the View button below.

< Back Next > Cancel

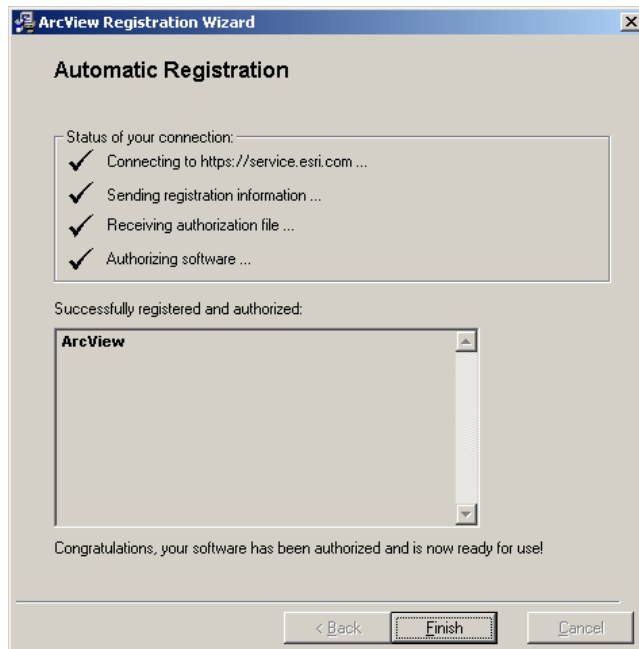

- f. Finish the registration form. Click Next.

- g. Enter the registration number printed on the software CD jacket. It will be a number such as *EVA123456789*. Click Next.

- h. If you did not install the extensions choose, “I do not want to evaluate any extensions at this time.” If you did install the extensions, choose “I would like to evaluate one or more of the following extensions for a limited time period.”, then check the extensions you would like to evaluate. Click Next.

- i. The software is registered and ready for use. Click Finish.

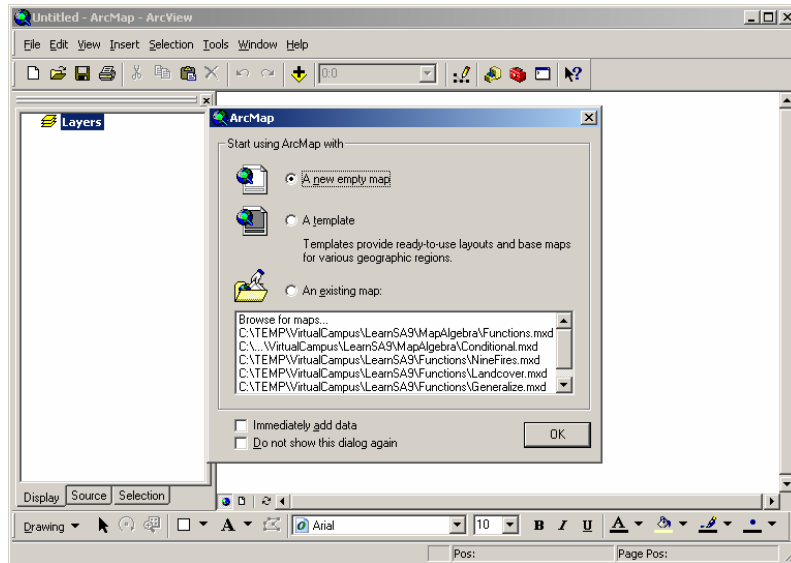

If the registration fails, make a note of the problem and use the help resources listed at the end of Part 1, “About the software installation”. You may also want to try a different registration method (see Part 7, *Other ways to register the software*).

- j. Continue with Part 6, “How to test the installation.”

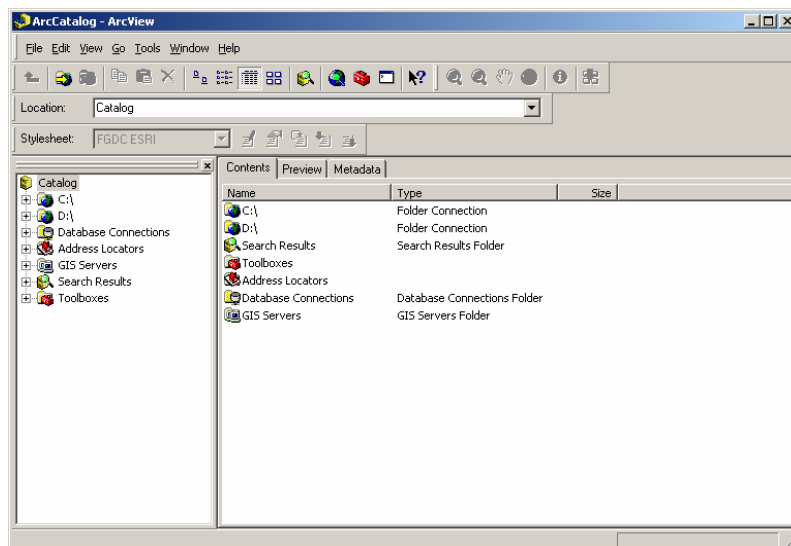

Part 6. How to test the installation

ArcView 9.1 contains the ArcMap and ArcCatalog applications. To confirm that the installation was successful, you should test both applications.

- a. Click the Start button, point to Programs, point to ArcGIS, and click ArcMap.

- b. Click OK to start using ArcMap with a new, empty map.
- c. Click the Close button (marked with a small x) in the upper-right corner of the ArcMap window.
- d. Click the Start button, point to Programs, point to ArcGIS, and click ArcCatalog.

- e. Click the Close button (marked with a small x) in the upper-right corner of the ArcCatalog window.
- f. Your ArcView 9.1 Demo Edition software installation and registration are complete. You do not need to read the remaining instructions until you are ready to uninstall the software.

Part 7. Other ways to register the software

The ArcView 9.1 Demo Edition software can be registered in four ways:

- over the Internet (described in Part 5, above)
- by e-mail
- at the ESRI web site
- by fax or regular mail

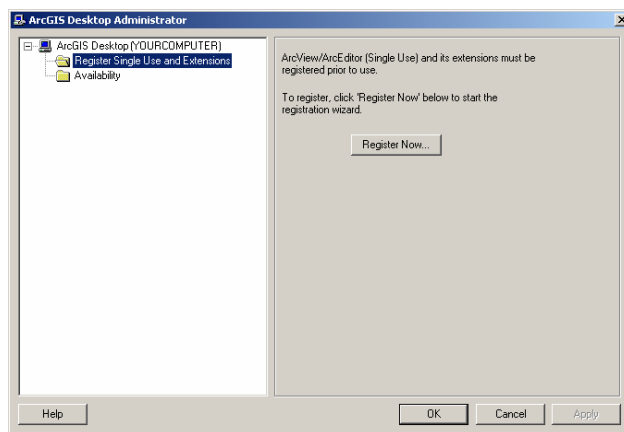

Instructions for each of these methods are found in the file `software_reg.pdf`, located on the ArcView 9.1 Demo Edition CD. To read this file, you need Adobe® Reader® 6.0 or higher software. Adobe Reader can be downloaded free of charge from www.adobe.com.

- Make sure the ArcView 9.1 Demo Edition software CD is in your computer's CD drive.
- In Windows Explorer, navigate to your CD drive: ESRI (D:). Click the drive icon to display the contents of the CD.
- Double-click the file `software_reg.pdf` to open it. Print the document.
- Follow the instructions in the `software_reg.pdf` document for the registration method you want to use. (After Internet registration, the option to register by e-mail is the most common method.)

Part 8. How to resume the registration process

Follow the instructions below if you have installed the ArcView 9.1 Demo Edition software but exited the registration process before completing it.

- Click the Start button in the Windows taskbar. Point to Programs, point to ArcGIS, and click Desktop Administrator.
- In the left-hand panel of the Desktop Administrator, click the "Register Single Use and Extensions" folder.

- In the right-hand panel, click Register Now.

- d. Go to Part 5, “How to register ArcView 9.1 Demo Edition software over the Internet”, or to Part 7, “Other ways to register the software.”

Part 9. How to uninstall the ArcView 9.1 Demo Edition software

It is recommended that you uninstall the software when the time limit expires. You must uninstall it before you can install a standard licensed version of ArcGIS 9 Desktop software.

- a. Click the Start button on your Windows taskbar, point to Settings, and click Control Panel.
- b. In the Control Panel, double-click Add/Remove Programs.
- c. In the Add/Remove Programs window, click on ArcView 9.1 (Demo Edition).
- d. Click Remove. Click Yes at the prompt to confirm the uninstall. Let the uninstallation process run.
- e. When the software has been removed from your computer, click the Close button (marked with a small x) in the upper-right corner of the Add/Remove Programs window.
