Just a reminder this change is for BLOOM-RESP, not for HAB-ROUTNE.

Subject: BLOOM-RESP RQ Comments

Kalina/Alicia/Curtis:

Cheryl and I will bring this up as an update at the beginning of today's teleconference. It's a bit off topic but would be helpful to get this to schedulers ASAP. Please distribute to necessary staff.

Please have schedulers edit the bottle groups to move the phytoplankton tests INTO bottle group B. And update the comments to the below. Make sure the RQs are tagged as **Priority 1** (some are still tagged as Priority 3).

Unless peak algal bloom season, may analyze toxin after consultation with Biology's Taxonomy Manager.

Bottle Group A - algal dominant taxon

Bottle Group B - toxin testing, nutrients, chlorophyll, algal full ID

There are multiple bottles per Group in case multiple sample targets or sample locations are needed. Samplers use best professional judgement to decide which samples are appropriate to collect for a particular response. All sets of bottles do not have to be filled at one time.

Please print two copies of algal job labels at login.
