Hi Shawn,

For Event WQAP-2022-07-13-02, everything was logged in correctly, but the samplers had a couple of typos. These are repeat sites (they're all BLOOM-RESP). Can you correct the site locations, please? Or do I need to have the samplers send the appropriate email/paperwork?

Site Location corrections needed for the 11:15 a.m. sample (should be 183rd Ave) and the 12:15 p.m. sample (should be NE Veg).

Thank you!

Amelia Rankin

Unless peak algal bloom season, may analyze toxin after consultation with Biology's Taxonomy Manager.

Bottle Group A,C - Priority 1
 For algal dominant taxon.

Bottle Group B,D - Priority 1
 For toxin testing, nutrients, and chlorophyll, algal full ID

There are multiple bottles per Group in case multiple sample targets or sample locations are needed. Samplers use best professional judgement to decide which samples are appropriate to collect for a particular response. All sets of bottles do not have to be filled at one time.
