Kara,

Mike confirmed that our FedEx shipment was delayed because of the storm so these samples expired before they could be analyzed.

Thanks,
Natalie

Kara,

I'm looking at our field sheets for these and they show that all samples were collected however there is a note stating that they should be entered for E. coli only. I'm assuming that this had something to do with the storm around that time and the Central Lab closure the week after these were collected. These samples were collected on Thursday and the lab was closed the following week so they may have expired before analysis. Our E. coli is sent to a local contract lab so it makes sense that these are the only results we have for those samples.

Thanks,
Natalie

Subject: FW: October RQs

Hi Natalie,

I am just trying to figure out more information about RQ-2018-10-01-51, -52, and -72. There were quite a few other analyses scheduled but from what I can tell, only the micros were sampled and dropped off to Flowers. I know usually we do PCRs for certain micros too.

Any more info would be great!

Thank you!

Kara

Kara,

I am afraid I know nothing about these RQs. Mike does the scheduling for the CD ROC, he will be able to answer your question. Mike is out of the office this week. If you need assistance sooner you can contact Natalie Ayala.

Thanks,
Curtis

Subject: October RQs

Hey Curtis we have some RQs that had quite a few analyses scheduled but it looks like only micros were collected and dropped off to Flowers. RQ-2018-10-01-51, -10-01-52, and 10-01-72. Just want to make sure these are in fact standalones and there isn't any accompanying data like PCR needed for these. I can get in touch with Mike if that's better, just wanted to touch base with you first.

Thanks!

Kara
