		F / M / Grab	E.coli	/	Entero	/	F.coli			

* "Sample Type" is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

"Sample Matrix" is used to indicate whether the sample is being dispensed by adding water (DW), groundwater (GV), surface water (SW), fresh surface water (FSW), saline surface water (SSW), soil sediment (SDMATF) or sludge (SLUD).

"Combiner Type" is used to indicate whether the container is plastic (P) or glass (G). Sample must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 6°C (42°F). Under "Preservative," list any preservatives that were added to the sample containers.

† Enter bottle has a label identifying sample ID, premeasured insecticide contained in the bottle, sample type, clean ID, and parameters for analysis.

‡ All bottles containing preservative may be cleaned with appropriate sample prior to collection.

The client is responsible for documentation of the sampling event. Please include specific sampling events on the sample custody form.
