Laboratory Sample Acceptability:	
pH < 10	BEAS Temperature: 5.4°C

¹ "Sample Type" is used to indicate whether the sample was a grab (G) or whether it was a composite (C).
² "Sample Matrix" is used to indicate whether the sample is being analyzed for drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), salt surface water (SSW), soft sediment (SDMAYT), or sludge (SLDG).
³ "Container Type" is used to indicate whether the container is plastic (P), glass (G), or metal (M).
⁴ Sample must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 4°C (44°F). Under "Preservative," list any preservatives that were added to the sample container.
⁵ Each bottle must be labeled identifying sample ID, preservative, preservation contained in the bottle, sample type, clear ID, and parameters for analysis.
⁶ The following information should be added to each bottle: label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.
⁷ All bottles not containing preservative may be stored with appropriate sample prior to collection.
⁸ The report is responsible for documentation of the sampling event. Please use special sampling events on the sample canopy form.
