Okay, will do.
Thanks Curtis

Good question,
I'm glad you asked. My notes for this WBID did not make it to the tracker. Will you sample this lake twice in September, two different weeks? In 2018 the September Chlorophyll a result was sky high. Kevin wants to see if there is a pattern.

5 regular samples + 1 extra in September = 6

Thanks,
Curtis

Okay, cool.
I am assuming that some data got qualified at some point for this WBID as it is asking for 6 nutrient kits instead of the usual 5.

Judy,

Lake Harvey, 1463D does need an LVI but not in 2019. I did not request an LVI from this lake in 2019 because this is a group 1 WBID. No biology (LVI, SCI, RPS etc.) was requested from group 1 or Group 5 WBIDs this year.

Thanks,
Curtis

Hey Curtis,
Just wanted to verify that this WBID does not need an LVI. On one of our spreadsheets it says the target is Biology and Nutrients but the tracker doesn't list any bio needs.
Thanks
Judy
