Good Morning Shawn,

I would go with the 1220 time. Recently our tablets, which we switched to instead of physical paper of field forms, has having a technical issue where it was stuck on standard time. Honestly, I get that feel and don't blame the poor things. That said the tablets were adding an hour to all of our sites without us knowing. The problem is fixed now but forms over the past month or so might have slipped through the cracks before we noticed.

Good Morning,

Can you please verify the collection times below on the submittal form and the overflow chain of custody?

Hi Shawn,

For the above event please double-check the collection times that are logged in vs the times on the field sheets vs the times for the overflow tests for all the sites. For most sites the overflow collection time matches the login but the field sheets show a different time. Please clarify for all sites. Let me know if you have questions. Below is one example:

Thank you,
