E.Coli = 250 mL ; Enterococci = 120 mL ; Fecal Coliform = 120 mL

Sample Type* is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

Sample Matrix* is used to indicate whether the sample is being discharged to drinking water (DW), groundwater (GW), surface water (SW), saline surface water (SSW), soil sediment (SSMNTL) or sludge (SLDG).

Sample Type* is used to indicate whether the sample is point (P) or grab (G).

Sample must be refrigerated or stored in ice for later collection. The maximum temperature during storage should be 4°C (42°F). Under "Preservative" has any preservatives that were added to the sample container.

1. Each bottle has a label identifying sample ID, preservative, preservative volume in the bottle, sample type, effluent ID, and parameters for analysis.

2. The following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.

3. All bottles not containing preservative may be used with appropriate sample prior to collection.

4. The effluent is responsible for documentation of the sampling event. Please note special sampling events on the sample container form.
