Project Name: RQ-2021-10-25-460

Laboratory Submission # 21110060

[illegible]

1. Sample type – Is used to indicate whether the sample was a girth (G) or webbing (W), composite (C).
2. Sample ID# – A unique number assigned to each sample.
3. Contaminant type – Is used to indicate whether the sample is bulk debris (BD), surface water (SW), groundwater (GW), surface water (GSW), saline surface water (SSAWT), soil sediment (SDANT), or sludge (SLDND).
4. Sampling method – Is used to indicate how the sample was collected. The sampling method may be performed or stored in wet or wet after collection. The temperature during storage should be less than or equal to 6°C (42°F).

Sample note: Provide all pertinent information that will aid in the identification of the sample.

Label: Preservative – Indicate any preservatives that were added to the sample container.

Impurities:

1. Each bottle has a label identifying sample ID, preservative(s) currently contained in the bottle, sample type, client ID, and parameters to be analyzed.
2. The following information should be added to each bottle label: collection with permanent black ink; date and time of collection; sampler's name or initials; and any field number or ID.
3. All bottles and containers preservative may be rinsed with tapwater immediately prior to collection.

This chart is responsible for documentation of the sampling event. Please note legal sampling events on the sample custody form.
