Enterococci  
E.coli (SM9223B Quantitray)

Laboratory  
Sample #

E.Coli = 250 mL ; Entero = 120 mL ; Fecal Coliform = 120 mL

[illegible]

\*Sample Type\* is used to indicate whether the sample was a grub (G) or whether it was a composite (C).

"Simple Markings" is used to indicate whether the sample is being discarded to drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), saline surface water (SSW), soil, sediment (SAND), or sludge (SLUDG).

Levamisole type is toxic to humans, whereas the non-toxic levamisole-free type is available. Do not use levamisole-free type. Sample must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 6°C (42.8°F). Under "Preservative," list any preservatives that were added to the sample container.

Information should be added to each bottle label after collection with permanent black ink: date and time of collection, sample's name or initials, and any field number or ID. A label identifying sample ID, premeasured preservative contained in the bottle, sample type, client ID, and parameters for analysis.

containing preservative may be used with appropriate sample prior to collection.
