E Coli = 250 mL ; Enterococci = 120 mL ; Fecal Coliform = 120 mL

Sample Type is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

Sample Matrix is used to indicate whether the sample is being discharged to drinking water (DW), groundwater (GW), surface water (SW), saline surface water (SSW), soil sediment (SDMT), or sludge (SLDG).

Container Type is used to indicate whether the container is plastic (P) or glass (G).

Sample Temp is refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 6°C (42.8°F). Under "Preservative" list any preservatives that were added to the sample container.

1. Each bottle has a label identifying sample ID, preservation, volume contained in the bottle, sample type, client ID, and instrument for analysis.

2. The following information should be called out on each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.

3. All bottles and containing preservative must be used with appropriate sample prior to collection.

4. The client is responsible for documentation of the sampling event. Please note special sampling events on this sample custody form.

1	Collection	Date	Time	Received By	Date	Time
		09/14/22	1313	Brooke Klatenich	9/14/22	1313
2	Relinquished by:	Date	Time	Received By	Date	Time
