Sample Type is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

Sample Matrix is used to indicate whether the sample is being directed to drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), saline surface water (SSW), soil, sediment (SDMNT), or sludge (SLDG).

Sample must be refrigerated or stored in wet ice after collection. The minimum temperature during storage should be 0°C (32°F). Under "Preservative," list any preservatives that were added to the sample container.

Each bottle must be labeled identifying sample ID, measured volume, date, time, client ID, and parameters for analysis.

The following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sample's name or initials, and any field number or ID.

All bottles not containing preservative may be stored with appropriate sample prior to collection.

The client is responsible for documentation of the sampling event. Please use special sampling events on the sample custody form.
