	F / M / Grab	E. coli / Enterococci		
	F / M / Grab	E. coli / Enterococci		
	F / M / Grab	E. coli / Enterococci		
	F / M / Grab	E. coli / Enterococci		
E.Coli = 250 mL ; Enterococci = 120 mL ; Fecal Coliform = 120 mL				

Sample Type is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

Sample Matrix is used to indicate whether the sample is being discharged to drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), soil, sediment (SDMT), or sludge (SLDG).

Composite Type is used to indicate whether the sample is composite (C) or glass (G).

Sample must be refrigerated or stored in wet ice after collection. The minimum temperature during storage should be 6°C (41.8°F). Under "Preservative" list any preservatives that were added to the sample container.

1. Each bottle has a label identifying sample ID, preservation procedure, date and time of collection, sample type, client ID, and parameters for analysis.

2. The following information should be added to each bottle label after collection with pen or marker: thick line, date and time of collection, sample's name or initials, and any field number or ID.

3. All bottles not containing preservative may be reused in the appropriate sample prior to collection.

4. The client is responsible for documentation of the sampling event. Please note special sampling events on the sample custody form.

Laboratory Sample Acceptability:

pH < 2.0 BEAS Temperature: 4.4°C
