1. The client is responsible for documentation of the sampling site. Please use special sampling forms or laboratory custody form.
2. Each bottle has a label identifying sample ID, preservation agent, volume contained in the bottle, sample type, client ID, and parameters for analysis.
3. All bottles must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 4°C (41°F). Under "Preservative" list any preservatives that were added to the sample container.
4. Each bottle must be labeled with identifying sample ID, preservation agent, volume contained in the bottle, sample type, client ID, and parameters for analysis.
5. The following information should be added to each bottle label after collection in all preservation bags: date and time of collection, sampler's name or initials, and any field number or ID.
