Sample #[illegible]

Laboratory Sample Acceptability

pH < 2: 0 BEAS Temperature: 916

1. Each bottle has a label identifying sample ID, preprocessed intercept vector $\mathbf{c}$ contained in the bottle, sample type, client ID, and parameters for analysis.
2. The following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.
3. All bottles not containing preservative may be rinsed with appropriate sample prior to collection.

4. The client is responsible for documentation of the sampling event. Please note special sampling events on the sample custody form.

Time: 1337
