|            |                                                |             |                                                             |  |  |  |          |
|            |                                                |             |                                                             |  |  |  |          |
|            |                                                |             |                                                             |  |  |  |          |
|            |                                                |             |                                                             |  |  |  |          |

Sample Type<sup>1</sup> is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

Sample Matrix<sup>2</sup> is used to indicate whether the sample is being discharged to drinking water (DW), groundwater (GW), surface water (SW), effluent water (EW), or sludge (SLDG).

Container Type<sup>3</sup> is used to indicate whether the container is plastic (P) or glass (G).

Sample must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 4°C (40°F). Under "Preservative," list any preservatives that were added to the sample container.

The client is responsible for documentation of the sampling event. Please note special sampling events on the sample custody form.

1. The following information should be added to each bottle label after collection:  
a. Date and time of collection  
b. Station ID  
c. Sample type  
d. Client ID  
e. Parameters for analysis

2. All bottles and containing preservative may be reused with appropriate sample prior to collection.
