	F / M / Grab	F / M / Grab	E. coli / Entero / Fecal coliform Date & Time:	

1. "Sample Matrix" is used to indicate whether the sample is being discarded to drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), saline surface water (SSW), soil sediment (SDMNT), or sludge (SLDG).
2. "Container Type" is used to indicate whether the container is plastic (P) or glass (G).
3. Sample must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 6°C (42.8°F). Under "Preservative," list any preservatives that were added to the sample container.
4. Each bottle has a label identifying sample ID, preservative type, collection date and time, sample type, client ID, and parameters for analysis.
5. The following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sample's name or initials, and any field number or ID.
6. All bottles not containing preservative may be stored with appropriate sample prior to collection.
7. The client is responsible for documentation of the sampling event. Please use special sampling events on the sample control form.

Laboratory Sample Acceptability:
pH < 2.0 BEAS Temperature: 4.6°C
