[illegible]

Simple Type is used to indicate whether the simple was a genit (G) or whether it was a composite (C).

"Sample Matrix" is used to indicate whether the sample is being disclosed to drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), saline surface water (SSW), soil, sediment (SDMNT), or sludge (SLDG).

“Container Type” is used to indicate whether the container is plastic (P) or glass (G). Samples must be refrigerated or stored in wet ice after collection. The maximum

and parameters for analysis

Information should be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.

responsible for documentation of the sampling event. Please note special sampling events on the sample custody form.
