Project Run/Location:

Laboratory Submission #:

521030708

[illegible]

1. The sample type is used to indicate whether the sample was a grab (G) or whether it was a composite (C).
2. Sample Medium is used to indicate whether the sample is being distributed to drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), saline surface water (SSW), soil sediment (SDANST), or sludge (SLDGO).
3. Container Type is used to indicate whether the container is plastic (P) or glass (G).
4. Sample must be refrigerated or stored in ice for after collection. The maximum temperature during storage should be 6°C (42.8°F). Under "Preservative," list any preservatives that were added to the sample container.
5. **Designations:**
 1. Each bottle has a label identifying sample ID, amount and preservative contained in the bottle, sample type, field ID, and parameters for analysis.
 2. The following information should be added to each bottle label after collection with collection, sample's name or initials, and any field number or ID.
 3. All bottles not containing preservative must be mixed well, appropriate sample prior to collection.
6. The client is responsible for documentation of the sampling event. Please note special sampling events on this sample custody form.
