* Sample Type* is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

Instructions:

1. Each bottle has a label identifying sample ID, prepackaged preservative contained in the bottle, sample type, cation ID, and parameters for analysis.
2. The following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.
3. All bottles not containing preservative may be stored with appropriate sample prior to collection.

The cation is responsible for documentation of the sampling event. Please note special sampling events on the sample custody form.

Sample must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 6°C (43°F). Under "Preservative" list any preservatives that were added to the sample container.

Sample Matrix: Is used to indicate whether the sample is being analyzed for drinking water (DW), groundwater (GW), surface water (SW), fresh surface water (FSW), saline surface water (SSW), soil sediment (SDMNT), or sludge (SLDG).

"Concentration Type": Is used to indicate whether the container is plastic (P) or glass (G).
