
Leasing Activities Information

Western and Central Gulf of Mexico Topographic Features Stipulation Map Package

for Oil and Gas Leases in the Gulf of Mexico

June 2008

MMS *Securing Ocean Energy &
Economic Value for America*

Introduction

These maps indicate the areas affected by the Topographic Features Stipulation which is routinely applied to leases in the vicinity of certain geographic features. For specific information regarding the stipulation, see the appropriate Notice of Sale and the Biological NTL No. 2004-G05.

For additional information you may contact Mr. James Sinclair of the MMS, GOMR, LE Biological Sciences Unit at (james.sinclair@mms.gov) or (504) 736-2789

The Department of the Interior Mission

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources; protecting our fish, wildlife, and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

The Minerals Management Service Mission

As a bureau of the Department of the Interior, the Minerals Management Service's (MMS) primary responsibilities are to manage the mineral resources located on the Nation's Outer Continental Shelf (OCS), collect revenue from the Federal OCS and onshore Federal and Indian lands, and distribute those revenues.

Moreover, in working to meet its responsibilities, the Offshore Minerals Management Program administers the OCS competitive leasing program and oversees the safe and environmentally sound exploration and production of our Nation's offshore natural gas, oil and other mineral resources. The MMS Minerals Revenue Management meets its responsibilities by ensuring the efficient, timely and accurate collection and disbursement of revenue from mineral leasing and production due to Indian tribes and allottees, States and the U.S. Treasury.

The MMS strives to fulfill its responsibilities through the general guiding principles of: (1) being responsive to the public's concerns and interests by maintaining a dialogue with all potentially affected parties and (2) carrying out its programs with an emphasis on working to enhance the quality of life for all Americans by lending MMS assistance and expertise to economic development and environmental protection.

The DOI and MMS does not warrant or guarantee the accuracy of these maps nor assume any responsibility or liability for any reliance thereon. These maps are not intended for use as a navigational tool nor as a legal document for Federal Leasing purposes.
