

Find A Park: POI Verification

User Guide

Help bring Florida State Parks to life by collecting the photos, stories, and points of interest that make each park unique. Every trailhead, scenic overlook, historic site, beach access, playground, boardwalk, and hidden gem you capture helps visitors discover new adventures and connect with the incredible places you protect every day. Together, we are building a digital gateway that inspires exploration, increases visitation, and showcases the best state park system in the nation.

Begin by using the [desktop webpage](#) to review and verify the POI pictures at each park.

Filter parks based on District and/or State Park and Managed Site, using the filter buttons above the table.

Upon selection of the district and/or park filter, the table will change to show only the parks and the associated POIs for the selected filter(s).

Click a row in the table to begin photo verification. When a row is selected, the map will zoom to the POI and if there is a picture associated with the selected feature it will appear below the map.

Above the picture (as seen in the next image), the POI Name and the number of photos captured for that specific POI are displayed. Hovering over the photos, you can scroll down to see multiple photos using your mouse; or you can drag the scroll bar down/up

on the side. You can click on the photo to make it bigger, which will make it easier to review and to be sure that the photo meets all requirements as outlined in the [media guideline](#).

Boy Scout Trail - Photos: 1

Select Approved if the photo meets all requirements as outlined in the [media guideline](#). Select Replace Photo if the photo needs to be replaced, due to not meeting the requirements. Select Missing Photo if you feel the POI should have a photo and currently doesn't. Leave a comment in the comment field if needed.

Once verification status is changed the table will automatically update. You can see all Approved, Replace Photo, or Missing Photo for each district and/or park by selecting the corresponding tab at the top of the table.
