Clark,

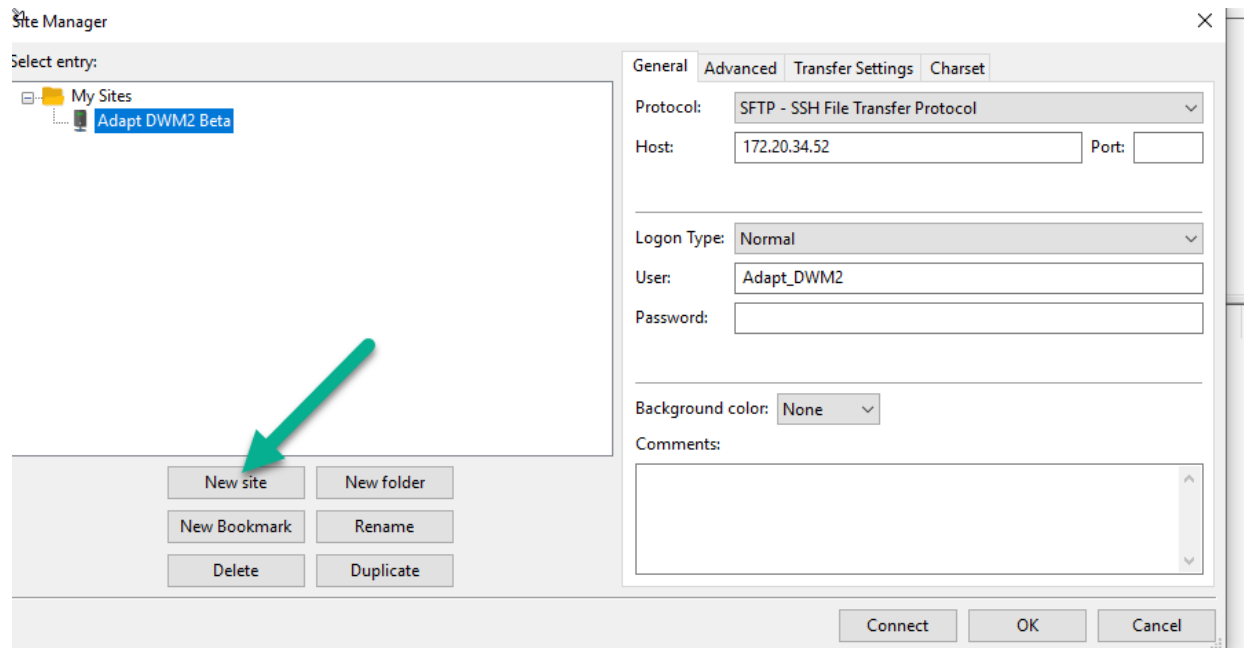

Beta: [Adapt_DWM2@172.20.34.52](#)
Prod: [Adapt_DWM2@172.20.34.128](#)

You may use different names for the connections with My Sites in FileZilla. Please see below for the directions to create My Sites in FileZilla. Please let us know if you would like us to create it on your machine.

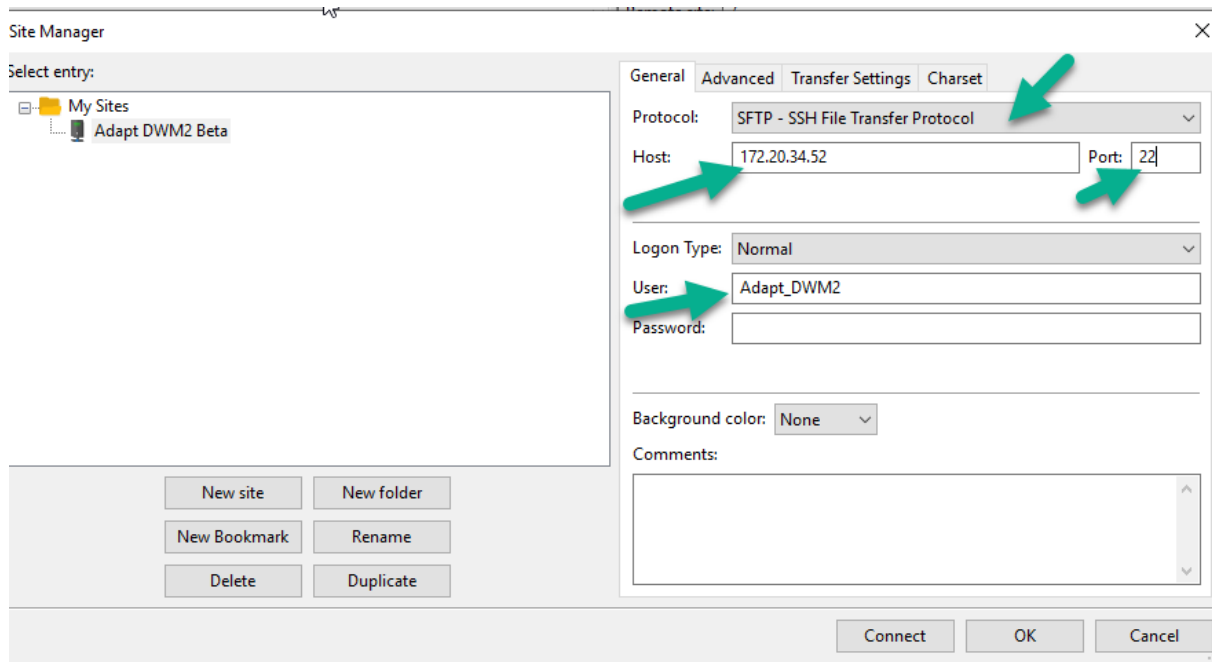

1. Click on

2. Click on New Site

3. Add the details as in the example below.

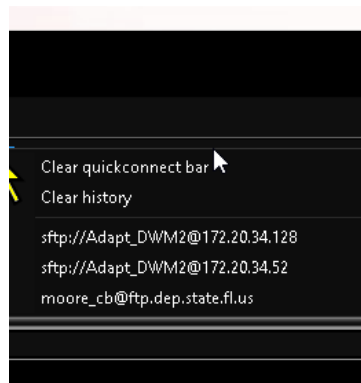

Thanks,

Thank you Ram.

I didn't notice you set up another sftp login.

Which one is beta and which one is prod?

The 128 or the 52?

And Can I rename the connections?

Thanks,

Clark Moore

Clark,

Sftp server accepts the files once the key setup on the server completed. File transfer using the FileZilla works with the key that we generated this morning. Password is not required. We will let you know.

I am leaving early today. Not quite sure when. I realize this can wait until the scripts have been modified. Do check before you come although I am not sure if you are finished with Tayo's computer.

If you can send me the location and username password I can enter it into FileZillas. I did this for the current ADaPT ftp site. Or we can wait until next year. I usually monitor uploads when I am home.

Thank you,

Clark Moore
