

Creating a New Testsite Training Video Transcript

To create a testsite Click Testsite, Mon Testsite.

On this screen click Create Record.

Enter in the Testsite Name.

As you tab through the fields; for Status, click List of Values; For Testsite Type, click List of Values, for Water Classification, click List of Values.

Click on the Geographic Location tab at the bottom.

Then click create record.

Review and update any information, then click commit changes, and exit.

Once you click Commit Changes a new testsite has been created.
