

Creating Testsite Associations Training Video Transcript

To create a Testsite Association, click Testsite, Mon Testsite.

Find the Testsite you wish to associate with a general disposal or waste processing record.

Click the Next Record button to move between multiple Testsites.

Then Click either the General Disposal or Waste Process tab.

Click the Class you wish to associate with the Testsite.

Then Click Update Associations.

To see all the Testsites associated with a general disposal or waste processing record click Waste Detail, and either General Disposal or Process (whichever association you made).

At the bottom click on the Monitoring Testsites tab.

And a list is created of all the Associated Testsites.
